PG MEDICAL TESTRUNNER

Overview

- PG Medical TestRunner simulates the PG Medical model test for practice, for entrance exam conducted for admission into reputed institutions in India.
- This has about 15000 questions in all the subjects
- The tests covered are AIIMS, AP, Karnataka, JIPMER, TNPC and many more
- PG Medical TestRunner gives performance analysis of the test taken which will help user strategize the preparation to achieve success.
- PG Medical TestRunner helps the user to review the test taken in many ways.

PG Medical TestRunner Features

- Model test
- Practice test
- Weak area test
- Report

Model Test Benefits

- This is a simulated test with questions from all the subjects
- There is an option to take model test entrance test wise and subject wise
- Benefit is user gets to know the weak areas of preparation immediately after the test
- Weak areas are displayed automatically after the test by comparing the score in each chapter with average score in the test

Practice Test Benefits

- User can take a test as per the need
- Test can be subject wise or chapter wise
- Number of questions and time is fixed by the user
- Benefit is user can take a test in the chapter as soon as the preparation on that chapter is completed
- Identify strong and weak areas to strategize the preparation

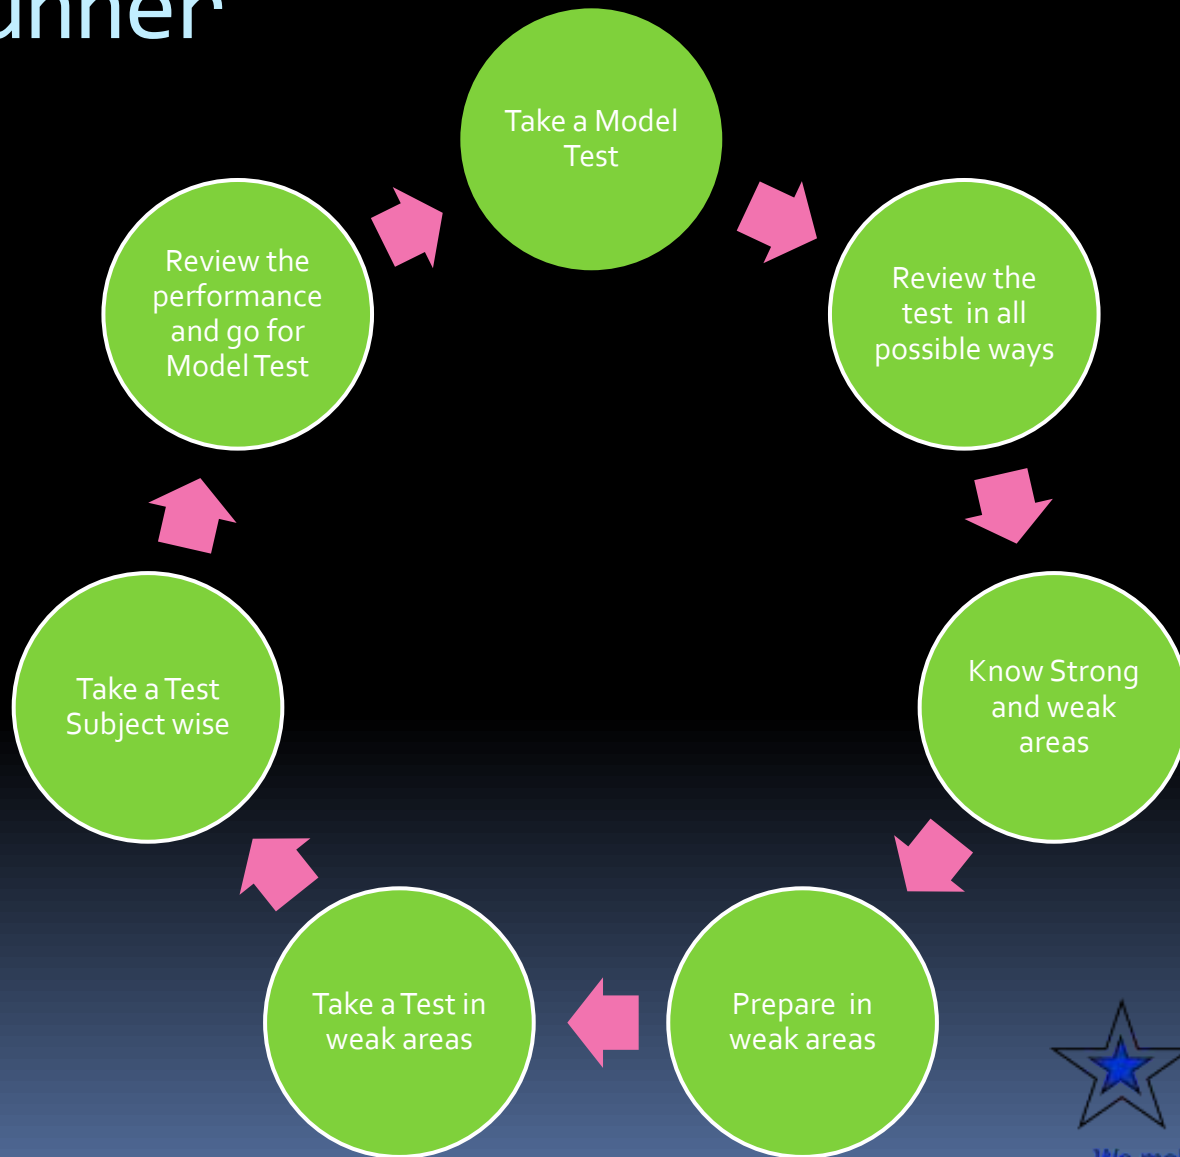

Weak Area Tests

- User can take a test in the identified weak areas subject wise or chapter wise
- Benefit is user need not search for the weak areas and take a test in them, software remembers it for the user
- Identify the weak areas and improve on them
- Consolidation of strengths and improving the weak areas is the success mantra

Reports

- User can revisit the test by reviewing wrong answered questions, un-attempted questions and questions where the time spent is more than expected time
- Graphical reports show the strong areas, weak areas
- Graphically analyze how is the improvement attempt wise

7 Steps success formula using TestRunner
